* The passing information in Section I pertains only to your most recent test results for any score recipients selected with your registration. If you have taken one of these tests previously, check Your Highest Scores and Overall Passing Status in Section II for your highest score. If no passing information is displayed, you did not select a score recipient.

** Average Performance Range - The range of scaled scores earned by the middle 50 percent of the test takers taking the test. It provides an indication of the difficulty of the test. Average Performance Rage is not computed when fewer than 30 test takers take this form of the test.

+ Score automatically reported to state licensing agency.

(I) - Information not provided or incorrectly gridded.

ETS will retain your score for 10 years for reporting purposes.

Section II Your Highest Scores and Overall Passing Status

Below are your highest test scores from the past 10 years and the overall passing status (for any score recipients selected for your most recent tests). Passing status is based on the passing score in effect on the test date or in the date reported. Scores are not reported if test is not required by the score recipient. Score recipients reserve the right to accept the reporting of scores but not necessarily the Passed/Not Passed status. Passed/Not Passed information is not provided if more than one qualifying score is used for a test, if qualifying score is not available, or if test taken is not used by the score recipient.

* Category-level information indicates the number of test questions answered correctly out of the subsets of all questions on a test. Because the content and difficulty of questions within a category may vary across different test forms, the category scores of individuals who have taken different forms of the test are not comparable. For these reasons, category scores should not be considered a precise reflection of a candidate's level of knowledge in that category. ETS recommends that category information not be used to inform any decisions affecting candidates without careful consideration of its inherent limitations.

** The range of scores earned by the middle 50% of a group of test takers who took this form of the test at the most recent national administration or other comparable time period. N/C means that this range was not computed because fewer than 30 test takers took this form of the test or because there were fewer than 8 questions in the category or, for a constructed-response module, fewer than 8 points to be awarded by the raters. N/A indicates that this test section was not taken and, therefore, the information is not applicable.
